B. RATES DURING OFF SEASON.

During the off season, the rates will be half of the season rates except in the case of single beds in Sankey's Rooms.

C. CONCESSION RATES TO SCHOOL CHILDREN DURING OFF SEASON.

The following concession rates will be allowed in Brown's Lodge and Sankey's Room to *bona fide* students in charge of responsible teachers.

Brown's Lodge.—There are three double blocks. Each block may be occupied by six students on payment of 12 annas per day; any extra student occupying it will pay at 2 annas per day.

Sankey's Rooms.—This contains three rooms. Each room may be occupied by eight students on payment of eight annas per day. Any extra student occupying the room will pay at two annas each.

N.B.—(1) Every block is furnished with a set of furniture suited to it and no extra articles will be made available even on extra payment. Furniture, etc. will not be permitted to be shifted from one block to another.

(2) School parties should make their own arrangements to provide themselves with necessary bedding, linen, etc.

(3) Parties occupying bungalows between sunrise and sunset are allowed the usual concession of half the prescribed rate of rent.

(4) Available vessels, etc., will be supplied free of cost on previous notice to parties making their own arrangements for cooking.

(5) Water carried to the bungalows and firewood supplied will have to be paid for at the usual rates.

GENERAL SECRETARIAT.

Cattle Shows.

Read again.—

Government Order No. 7007-24—L. B. 189-09-3, dated the 22nd February 1911, prescribing Rules for regulating cattle shows and fairs.

ORDER No. L. 5568-86—L. B. 64-24-59, DATED 14TH MARCH 1928.

In modification of the Rules issued under the Government Order of the 22nd February 1911 read above, and in virtue of power vested in them under Section 100 (2) of the Mysore District Boards Regulation 1926, Government are pleased to prescribe the following revised Rules for regulating cattle shows:—

RULES.

1. All shows should be organised by an Economic Committee appointed by the District Board consisting of people interested or actually engaged in cattle breeding and presided over by an official or non-official gentleman who shall be considered responsible for all arrangements connected with the show.

2. Three months prior to every show a short notice of such show shall be published in English and Kannada in the *Mysore Gazette* by the Chairman of the Show Committee.

3. The Deputy Commissioner of the District will be competent to prohibit the holding of a show on account of the prevalence of cattle diseases in the locality or to require the closing of a show when cattle diseases appear on the show grounds.

4. All the expenses connected with the show including the cost of prizes, and of sanitary and other arrangements shall be met out of District Funds to which private subscriptions, if any, and fees levied on cattle admitted to the show shall be credited.

5. (1) The District Board may levy fees on cattle brought to the show subject to the following maximum rates:—

(1) Eight annas for every pair of big bullocks.

(2) Four annas for every pair of small bullocks.

(3) Four annas for a single bull or cow or other cattle competing for prizes.

(2) The fees fixed under the above clause should be published a week prior to the date of the show, and notified in the prominent places on the show grounds and at the Ookads where fees are collected.

6. Within one month after the holding of the show, a full report of the show shall be forwarded to the District Board and the Deputy Commissioner of the District.

R. RANGA RAO,
General Secretary to Government.

Report on the progress of the Krishnarajasagara and allied works for 1926-27.

READ—

Letter No. 1935, dated the 3rd November 1927, from the Chief Engineer, Krishnarajasagara Works, forwarding the report on the progress of the Krishnarajasagara and allied works during the year 1926-27.

ORDER No. G. 10770-5—G. M. 107-27-6, DATED THE 20TH MARCH 1928.

Recorded.

2. Mr. K. R. Seshachar, B.A., B.E., C.E., was in charge of the works throughout the year.

3. *Important Measures.*—The Committee appointed by Government with Sir M. Visvesvaraya as Chairman to investigate the possibility of the development of irrigation under the Cauvery completed their investigation and submitted a report to Government in May 1927. They recommended the immediate construction of the North Bank High Level Canal. Government have since sanctioned this project at an estimated cost of Rs. 222 lakhs. The scheme is expected to bring under irrigation an additional area of 1,20,000 acres after full development. The Canal will bear the name of His Excellency Lord Irwin, Viceroy of India.

Government sanctioned an estimate for Rs. 3,58,000 for the works connected with the shifting of the Yedatore Town from its present unhealthy site. These works have almost been completed.

The arrangements made during the previous year for the supply of water, for hot weather irrigation, for growing sugar-cane and manurial crops were repeated during the year under report. The area thus irrigated was 17,237 acres as against 31,570 acres in the previous year, yielding a revenue of Rs. 31,440. As the results of this experiment during the past two years have not been very encouraging, the question of revising the arrangements is under consideration.

4. *Grant and Outlay.*—The grant for the works of the Krishnarajasagara Works Circle, under all heads was Rs. 12,76,059 as against Rs. 11,62,035 in the year previous. This included, among other items, a grant of Rs. 9,54,600 under capital expenditure, 1,33,000 under revenue expenditure and Rs. 1,31,657 under Irrigation Cess, District and Palace Funds. The extension of the Ramanathpur Channel and the repairs to the Madhavamantri Anicut were completed. The total outlay during the year was Rs. 12,31,292.

Construction.—The construction of the Krishnarajasagara Dam has been practically completed. The masonry has been raised throughout to a height of 130 feet above the level of the bed of the river. The construction of the parapet walls on the dam is nearing completion. Ornamental towers and pillars have been raised at intervals to the top level of the parapet. The laying out of the terraces and terrace gardens in the rear of the dam has been taken in hand. Except protective works, the other items connected with the Waste Weir have been completed. The scours in the platform behind the eighty sluices were repaired. The roadway over the trestle bridge was formed and was provided with railings on either side.

5. *Acquisition.*—An area of 650 acres was acquired during the year at a cost of Rs. 1,53,166. Lands of the aggregate value of Rs. 48,142 were given in exchange The compensation given for loss of crops for houses and vacant sites amounted to Rs. 5,481 and 31,239 respectively.

6. *Canals.*—Certain portions of the Mandagere Channel were widened and the bed was lowered. New regulators were constructed across some of the main and branch channels. The water supply of the Chamarajendra Right Bank Channel was improved by removing the bed and side projections in the first eight miles.

The grant from the Irrigation Cess Fund for the annual and special repairs to the Irrigation Works in the Cauvery Valley was Rs. 1,30,793 and the outlay was Rs. 1,42,128. The excess in outlay is reported to be due to the fact that no separate provision was made for tools and plant charges on the work outlay in the Lower Channels Division.

In addition to the silt clearing and other annual repairs to the several channels, certain special repairs were executed to the C. D. S. Virijanadi and Ramaswami Channels. The present arrangements under which the responsibility for weed clearance of the branch channels rests with the raiyats holding lands under them have been found unworkable in practice and proposals are under consideration for the taking over of this work by Government and for the levy of an acreage cess to meet the cost.

7. *Progress of cultivation.*—The area under irrigation under the old channels of the Cauvery Valley is stated to have increased by about 200 acres and action has been taken to bring under the plough a new area of about 1,300 acres. Government observe that the progress of cultivation under the new channals has been slow. They desire that streneous efforts should be made to bring under cultivation in the near future all the lands available for irrigation.

8. *General.*—Government note with satisfaction, the efficient manner in which under the guidance of Mr. K. R. Seshachar, the officers and staff employed on the Krishnarajasagara Works discharged their duties during the year under report.

R. RANGA RAO,
General Secretary to Government.
